

Emmanuel Ulodo

Full-Stack Developer

Lagos, Nigeria · ulodoe@gmail.com · github.com/ELMANNY4000 · @ElmannyUlodo

PROFILE

Full-stack developer with 2 years of experience building end-to-end web applications, from database architecture to polished, production-grade user interfaces. Works across the entire stack — React, Node.js, TypeScript, Python, and cloud infrastructure — with a focus on clean architecture, scalable systems, and maintainable code that performs under load. Enjoys the full product lifecycle, from requirements gathering through to production deployment.

EXPERIENCE

Saint Club — Full-Stack Developer

2026 – Present

- Building Saint Club, a faith-inspired streetwear e-commerce brand, as a complete, self-contained site — covering brand identity, product photography integration, and a full shopping experience across Home, Shop, Product Detail, Cart, About, and Contact pages.
- Owns the project end to end: architecture, UI/UX, and implementation, shipping a 100% self-contained, single-file build.

SKILLS

- | | | | |
|--------------|-----------|----------------|-----------------|
| • React | • Node.js | • TypeScript | • Python |
| • PostgreSQL | • MongoDB | • Docker | • AWS |
| • GraphQL | • Next.js | • Tailwind CSS | • Redis |
| • CI/CD | • Git | • REST APIs | • System Design |

APPROACH

Comfortable designing RESTful APIs, optimizing PostgreSQL queries, and deploying containerized services on AWS. Likes working in teams where engineering decisions are discussed openly and shipping is a shared goal.
